ttps://github.com/	UTC+2	(+1)	res@protonmail.com
I'm a Scientific Programm work in natural sciences,	_	_	
Skills/Experience			
Machine Learning	Prototypes	Remote Work	MLOps/DevOps
Data Sciences	Linux Systems	Education/Mentoring	Rubber Ducking
Technologies			
Python/PyTorch/sklearn C/C++	R/dplyr skimage/scipy.signal	GDAL/cartopy/ESA-SNAP	AWS/GCP/firebase Docker
Developed simple offli Led technology transfe	ne satellite image labe	f satellite scenes, serv ler, supporting all shap prototypes to productio	ely geometries by lat/
_	Machine realiting kese	archer II March	2020 - April 2022
Research on binaries i Developed feature extr Implemented, verified	n vulnerability detection caction pipeline over how incorporated ML/DL contractions of the contraction of th	on & improving code legal sted virtual machines on the from academic research proposals for/	terrabytes of data h_into release products
Research on binaries i Developed feature extr Implemented, verified Participated in author	n vulnerability detection caction pipeline over how incorporated ML/DL contractions of the contraction of th	on & improving code lega sted virtual machines on de from academic researc proposals for	bility from decompilat: terrabytes of data h_into release products
Research on binaries i Developed feature extr Implemented, verified Participated in author Developed x-platform of Developed core tools f	n vulnerability detection action pipeline over how a incorporated ML/DL cooking & reviewing Mobile & Full Stack Editizen science phone approximation of the science of the	on & improving code legal sted virtual machines on de from academic research proposals for for for & wild sightings & individual	bility from decompilate terrabytes of data h into release products funding solicitation 2019 - March 2020 life population surveys
Research on binaries i Developed feature extr Implemented, verified Participated in author Developed x-platform of Developed core tools f Contributed to data according to the contributed to the contributed to data according to the contributed to the c	n vulnerability detection of the control of the con	on & improving code legal sted virtual machines on de from academic research proposals for/	bility from decompilate terrabytes of data h into release products funding solicitation 2019 - March 2020 life population surveys identification studies
Research on binaries in Developed feature extra Implemented, verified Participated in author Developed x-platform of Developed core tools of Contributed to data and Prototyped employee extra Developed comployee extra Developed employee extra Developed femployee extra Developed feature extra Developed feat	n vulnerability detection action pipeline over how incorporated ML/DL cooling & reviewing Mobile & Full Stack Editizen science phone apport tracking Medicess API & web UI, support support recommender system	on & improving code legal sted virtual machines on de from academic research proposals for/	bility from decompilat: terrabytes of data h into release products funding solicitation 2019 - March 2020 life population surveys identification studie 2018 - Sept 2018 ticket triage/assignment
Research on binaries in Developed feature extra Implemented, verified Participated in author Developed x-platform of Developed core tools of Contributed to data and Prototyped employee expessioned & completed prototyped for the complete prototy	n vulnerability detection action pipeline over how incorporated ML/DL cooling & reviewing Mobile & Full Stack Editizen science phone apport tracking Medicess API & web UI, support support recommender system	on & improving code legal sted virtual machines on de from academic research proposals for March of for & wild sightings & individual porting researchers in Matural Text) Natural Text) June to eliminate weeks in papers & advisement of the steel with the steel weeks in papers & advisement of the steel with the steel weeks in papers & advisement of the steel with the steel with the steel weeks in papers & advisement of the steel with the steel weeks in papers & advisement of the steel with the s	bility from decompilat terrabytes of data h into release product. funding solicitation 2019 - March 2020 life population survey identification studic 2018 - Sept 2018 ticket triage/assignment
Research on binaries in Developed feature extra Implemented, verified Participated in author Developed x-platform of Developed core tools of Contributed to data and Prototyped employee extended to the Designed & completed possigned & completed possigned analyzed relationship	n vulnerability detection action pipeline over how a incorporated ML/DL cooking & reviewing Mobile & Full Stack Editizen science phone approximately approxi	on & improving code legal sted virtual machines on de from academic research proposals for March of for & wild sightings & individual porting researchers in Matural Text) Natural Text) June to eliminate weeks in papers & advisement of the steel with the steel weeks in papers & advisement of the steel with the steel weeks in papers & advisement of the steel with the steel with the steel weeks in papers & advisement of the steel with the steel weeks in papers & advisement of the steel with the s	bility from decompilat terrabytes of data h into release product funding solicitatio 2019 - March 2020 life population survey identification studi 2018 - Sept 2018 ticket triage/assignme op employees 2017 - June 2018

Developed anomaly detectors for noisy marine acoustics, based on variational auto-encoders

Measured effects of to reduce noise & improve audio quality

- R&D Software Engineer April 2014 - Dec 2015

Developed processing pipelines & workflows for work on multiple SBIR programs

Helped run professional trainings to disseminate new programming languages

Wrote on disenfranchisement under for feasibility study

University University

Masters Research - Machine Learning (Marine Acoustics)

Developed track explorer for 10YR continuous audio track, supporting

Sept 2017 - Dec 2019
