I'm a Scientific Programmer / Machine Learning Researcher driven by interdisciplinary work in natural sciences, security/privacy systems, OSInt &|| citizen sciencery.

Skills/Experience

Machine Learning Prototypes Remote Work MLOps/DevOps Data Sciences Linux Systems Rubber Ducking Education/Mentoring

Technologies

Python/PyTorch/sklearn R/dplyr GDAL/cartopy/ESA-SNAP AWS/GCP/firebase

C/C++ skimage/scipy.signal Gtirb/Dwarf/asts.AST Docker

Blue Oasis - Digital Twin Engineer (Ocean Science) June 2025 - present

Contributed to multi-label ML marine acoustics pipeline, for tracking vessels & marine life Worked with acoustics researchers to develop & implement custom features for event detection Full stack security & performance contributions on customer facing analytics & IR dashboard

- Scientific Programmer (Satellites) May 2022 - March 2025 Global Fishing Watch

Implemented remote sensing pipeline for detecting vessels & matching to reported GPS locations Evaluated vessel detection over terrabytes of processed synthetic aperture radar (SAR) images Developed gfwsat to join & catalog millions of satellite scenes, serving global ocean surveys Developed custom labeler on very large images, to make ML training data for object detection Led technology transfer work, moving research prototypes to production & automated pipelines

GrammaTech - Machine Learning Researcher II March 2020 - April 2022

Research on binaries in vulnerability detection & improving code legability from decompilation Developed feature extraction pipeline over hosted virtual machines on terrabytes of data Implemented, verified & incorporated ML/DL code from academic research into release products Participated in authoring & reviewing SBIR/STTR proposals for DOD/DARPA funding solicitations

HappyWhale - Mobile & Full Stack Engineer March 2019 - March 2020

Developed x-platform citizen science phone app for eco-tourism & wildlife population surveys Developed core tools for tracking marine life sightings & individual whale identification Contributed to data access API & web UI, supporting researchers in population ecology studies

NASA Jet Propulsion Lab - Data Science Intern (NLP) June 2018 - Sept 2018

Prototyped employee expert recommender system, to eliminate weeks in ticket triage/assignment Designed & completed prototype from research papers & advisement of top NASA/JPL employees

- Graduate Research Assistant OHSU Neuroimaging Lab Oct 2017 - June 2018

Analyzed relationship of adjacent microbiome populations for menopause & reproductive health Developed processing/audit tools for survey & fMRI data to support ABCD study for ADHD/ASD Provided git, project management & security trainings for teams with varying readiness levels

Masters Research (OHSU) - Machine Learning (Marine Acoustics) Sept 2017 - Dec 2019

Developed track explorer for 10YR continuous audio track, supporting Aloha Cabled Observatory Developed anomaly detectors for noisy marine acoustics, based on variational auto-encoders Measured effects of spectral subtraction & DL models to reduce noise & improve audio quality

Galois Inc. - R&D Software Engineer April 2014 - Dec 2015

Developed processing pipelines & workflows for evaluator work on multiple DARPA SBIR programs Helped run professional trainings to disseminate new probabilistic programming languages Wrote on disenfranchisement under Free & Fair for secure internet voting feasibility study

Oregon Health Science University Computer Science & Machine Learning

Western Washington University Computer Science & Cryptography Bachelor of Science, Math Minor

Masters of Science
