Philip ████████████ ████████████ ██████+res@protonmail.com
UTC−8   (+1) ███.███.████

https://github.com/████████

I'm an experienced Software Engineer / Data Scientist with passion for interdisciplinary work in environmental, scientific, social good, OSInt & citizen science projects.

Skills/Experience

Machine Learning	Prototypes	Remote Work	Ticketing Systems
Data Science	Linux Systems	Education/Mentoring	Rubber Ducking

Technologies

Python/PyTorch/sklearn	R/dplyr	skimage/scipy.signal	████/Dwarf/████████
C/C++	Angular/NativeScript	Docker	AWS/GCP/firebase

████████████ – Scientific Programmer   May 2022 – present
Remote sensing research, tracking ████ from ███/██████ satellite images & ███████ data
Developed ██████, to catalog millions of satellite images across providers for global surveys
Led technology transfer work, moving research prototypes to production & automated pipelines
Managed small interdepartmental/international projects to accomplish interdisciplinary work

████████ – Machine Learning Researcher II March 2020 – April 2022
Performed DL/ML research for binary vulnerability detection & decompilation legibility tasks
Developed big data feature extraction pipeline, distributed over cloud hosted virtual machines
Implemented & incorporated code from academic research publications into release products
Participated in authoring & reviewing ███/███ proposals for ██/████ funding solicitations

████████ – Mobile & Full Stack Engineer   March 2019 – March 2020
Developed ██████████████, x-platform citizen sciencery app to promote █████████ & research
Developed core tools for tracking █████████ sightings & individual █████ identification
Contributed to data access API & web UI, supporting researchers in ████████████ studies

████████████████ – Data Science Intern (NLP)   June 2018 – Sept 2018
Prototyped employee expert recommender system, to eliminate weeks in ticket triage/assignment
Designed & completed prototype from research papers & advisement of top ███████ employees

██████████████ – Graduate Research Assistant   Oct 2017 – June 2018
Analyzed relationship of adjacent █████████ populations for ████████ & ████████████ health
Developed data processing/audit tools for survey data & ████ data, supporting ███████ studies
Provided git, project management & security trainings for teams with varying readiness levels

Graduate Research ████████ – Machine Learning (Audio Data)   Sept 2017 – Dec 2019
Developed VAEs & anomaly detectors for applied ██████ acoustics in very noisy environments
Developed █████ track explorer, enabling research on 10 year (12 TB) continuous audio track
Measured effects of ████████████████ & █ noise reduction models to improve sound quality

██████████ – Volunteer Developer & Consultant   Nov 2015 – present
Developed remote sensing tools to classify light chemistries in photos for ██████ studies
Consult on image processing for low cost diagnosis of ███████████████████████████████████
Provided technology training/consult on code optimization, medical NLP & image processing

██████████ – R&D Software Engineer   April 2014 – Dec 2015
Developed processing pipelines & workflows to enable █████████ work for █████ programs
Helped run professional trainings to disseminate new ████████████ programming languages
Wrote on disenfranchisement under █████████ for ████████████████ feasibility study
