Philip ████████████ ████████   ████████+res@protonmail.com
                        UTC−8   (+1) ███.███.████
https://github.com/██████

I'm an experienced Software Engineer / Data Scientist with passion for interdisciplinary work in environmental, social good, & citizen science projects.

Skills/Experience

Machine Learning	Prototypes	Remote Work	Ticketing Systems
Data Science	Linux Systems	Education/Mentoring	Rubber Ducking

Technologies

Python/PyTorch/sklearn	R/dplyr	skimage/scipy.signal	█████/Dwarf/████████
C/C++	Angular/NativeScript	Docker	AWS/GCP/firebase

████████████████ **– Scientific Programmer**   **May 2022 – present**
Research developer on large scale studies for detection of unreported/illegal boating activity
Developed █████, to organize satellite data from public providers for global ocean surveys
Developed inter-departmental collaboration strategies & code best practices for ██ teams

████████ **– Machine Learning Researcher**   **March 2020 – April 2022**
Performed DL/ML research for binary vulnerability detection & decompilation legibility tasks
Developed data pipeline to distribute feature extraction over networked virtual machines
Implemented & incorporated code from academic research publications into release products
Participated in authoring & reviewing ███/███ proposals for ███/████ solicitations

████████ **– Mobile / Full Stack Engineer**   **March 2019 – March 2020**
Developed ████████████, a x-platform citizen sciencery app to support ecology research
Developed core tools for tracking █████████ sightings & individual █████ identification
Contributed to data access API, supporting researchers in population ecology projects

████████████████████ **– Graduate Data Science Intern**   **June 2018 – Sept 2018**
Developed employee expert recommender system, to eliminate weeks in ticket triage & assignment
Designed & completed prototype from research papers & advisement of top ████████ employees

██████████████ **– Graduate Research Assistant**   **Oct 2017 – June 2018**
Analyzed relationship of adjacent microbiome populations for menopause & reproductive health
Developed data processing/audit tools for survey & fMRI data, supporting ADHD/ASD studies
Provided git, project management, & security trainings for teams with varying readiness levels

Graduate Research ████████ – Machine Learning (Audio Data)   **Sept 2017 – Dec 2019**
Developed VAEs and anomaly detectors for marine acoustics from signal processing research
Developed █████ track explorer, enabling research on 10 year (12 TB) continuous audio track
Measured effects of spectral subtraction & deep noise reduction techniques on ML models
Led & enabled a four week community data deep dive, through ████, on marine acoustics

████████████ **– Volunteer Developer & Consultant**   **Nov 2015 – present**
Developed remote sensing tools to classify citiscape light sources for light pollution study
Image processing consult on low cost blood tests for infant hypoxic ischemic encephalopathy
Provided technology trainings/consultation on code optimization, NLP, & image processing

████████████ **– R&D Software Engineer**   **April 2014 – Dec 2015**
Developed processing pipelines & workflows to enable █████████ work for █████ programs
Helped run professional trainings to disseminate new probabilistic programming languages
Wrote on disenfranchisement under █████████ for ██████████████████ feasibility study

---

████████████████████ University	**██████████████████ University**
Computer Science & Machine Learning	**Computer Science & Cryptography**
Masters of Science	Bachelor of Science, Math Minor
